

Sustainable Urban Freight Coalition

Charter

1. The Sustainable Urban Freight Coalition (SUFC), curated by The Energy and Resources Institute (TERI), is a consortium of stakeholders of urban freight from government, industry and academia. SUFC aims for decarbonising urban freight in India by
 - Facilitating discussion on decarbonizing urban freight in national, state and local level policy processes
 - Demonstrating technical feasibility, economic viability and environmental benefits of low carbon technologies through scalable pilot projects in urban freight
 - Advocating rapid low carbon transition of urban freight by facilitating partnerships and experience sharing
 - Providing platform for sustainable urban freight related knowledge building
2. As a member of SUFC we shall take action on urban freight and climate change within the mandate that we have within our state/city/company by:
 - a. Committing to take action for achieving
 - i. Net zero emissions from urban freight in India by 2050.
 - ii. India's target of EV30 by 2030 by accelerating adoption of EVs in urban freight.
 - iii. 33-35% reduction in CO2 emission intensity from urban freight between 2005 and 2030
 - b. Promoting directions and policy actions for building roadmap for minimizing impact of urban freight on air pollution, congestion and accidents.
 - c. Building partnerships for interventions to reduce costs and emissions from urban freight
 - d. Contributing to promote SUF activities and objectives.
3. In addition, we pledge to nurture SUFC community by:
 - a. Sharing our experiential knowledge through SUFC platforms
 - b. Actively participating in SUFC workshops and discussion forums
 - c. Building SUFC community members
4. We understand that our membership may be reviewed annually
